Dear GPA Families,

We conducted a Shelter in Place drill today during school.

Shelter in Place would be used during an emergency such as severe weather when students need to be away from exterior walls and windows. Interior safe locations have been identified and have been located in areas of the building that maximize the safety of occupants. When students are in their safe locations, they are asked to be quiet in order to hear instructions as well as be in the "duck and cover" position so that their head is covered.

We like to inform families whenever such drills are conducted at school in case students come home with more questions or want to talk more about the process.

Please reach out if you have questions.
