November 4, 2022

Dear Grand Peak Academy Students, Parents, and Stakeholders,

This statement is to inform the stakeholders of Grand Peak Academy that our school has been identified as a Target Support and Improvement School due to low participation on the 2021-2022 school year Colorado Measures of Academic Success (CMAS) exam by students classified as eligible for free and reduced meal programs. Under Federal legislation, ESSA, schools with a participation rate under 95% in any one student group will be given this designation. The method for determining this designation is determined by the Colorado Department of Education and more information can be found at:

<https://www.cde.state.co.us/fedprograms/essa-identification-summary-18-19>

Grand Peak Academy has identified several strategies to be implemented to improve this student group participation rate and increase GPA's overall CMAS participation rate. Grand Peak Academy will continue to hold all students to high academic standards by adhering to the Colorado Academic Standards and our school curriculum. We strive to support and prepare our students for success in all aspects of their lives.

If you have questions about this designation, you can reach out to the GPA administration.

Thank you,  
GPA Admin
